

# Look what Medical Employment Directory is up to now!

A new service is being offered to protect your hiring process. At MED we empower practices to make informed hiring decisions by providing timely, accurate and complete pre-employment screening. MED will remove the "blind spots" when hiring employees. Call today to find out how effective pre-employment screening can be.

## Why have a background check?

Getting a background check on potential hires will streamline your hiring process. It provides a consistent screening method for all candidates that will limit your potential liability from bad hires. Background checks can also reduce expensive employee turnover and help minimize employee fraud and theft.

## Do you know who you are hiring?

Consider these before making the offer . . .

- 30% of all job applicants make material misrepresentation on resumes
- 44% of applicants lie about their work history
- 41% of applicants lie about their education
- 23% of applicants falsify their credentials or licenses
